AREAS OF EXPERTISE

- Strong background in varied technical aspects of Cybersecurity, including Firewalls, IDS/IPS, Routing, OS, and dedicated cyber tools.
- Expertise in security review and vulnerability scan, secure design, and system design.
- Proven track record of stakeholder influence and progressing Cybersecurity initiatives.
- Outstanding presentation skills.
- Conversant in Spanish.

KEY ACHIEVEMENTS

- Built an end-to-end security program at CyberCX, cutting risk exposure ~29% and deploying a UEBA platform.
- Reduced exposure at Transurban by rolling out an IR playbook and training, protecting IP and privacy at multi-billion scale.
- Cut audit scope at Transurban, improving risk ratings and contributing to share price gains.
- Secured provider terms and deployed caching proxies, yielding as much as 37% lower bandwidth spend.

CAREER SUMMARY

CyberCX Senior Security Engineer	2019 – 2023
Sense of Security Security Team Lead	2016 – 2019
Brennan IT Pty Ltd Security Advisor	2014 – 2016
Transurban Systems Security Analyst	2011– 2013

EMPLOYMENT HISTORY

CyberCX **2019 – 2023**
Senior Security Engineer

Background:

CyberCX is a leading cyber firm delivering bespoke defences, threat analytics, and major incident handling; primary locations span Melbourne, Sydney, Brisbane, Perth, and Canberra.

Position Overview:

Lead CyberCX's security program, run audits, assessments, and design; partner across teams, coach juniors, and deliver
broad security awareness training; manage outsourced firewall monitoring for timely detection and response; enforce policies and cut risk via periodic reviews.

Key Achievements:

- Created and launched an enterprise security program, lowering potential vulnerabilities by 29% in year one.
- Directed UEBA rollout, boosting enterprise detection coverage.
- Launched org□wide cyber training, lifting staff awareness by 45%.
- Contained a severe breach rapidly, limiting impact and stopping data theft.
- Worked with counsel to align to new privacy laws, averting possible fines.
- Built a strong IR plan, cutting MTTR by 37%.

Sense of Security **2016 – 2019**
Security Team Lead

Background:

Sense of Security operated a niche cyber consultancy delivering network security reviews, forensics work and advisory services to mid□market and large firms nationwide.

EMPLOYMENT HISTORY (CONTINUED)

Position Overview:

Oversaw cyber programs spanning advanced network reviews, platform upgrades, and forensic workflows; coordinated with layered vendors and agencies for secure ops; upheld availability targets in line with standards.

Key Achievements:

- Directed migration of core systems to cloud, boosting scale and trimming run costs.
- Refined IR playbooks, cutting MTTR by 25%.
- Identified and blocked an advanced intrusion, stopping access to sensitive client data.
- Contributed materially to ISO 27001 attainment, strengthening the organisation's standing for strong security practices.
- Designed and executed a full DR plan, sustaining operations through cyber events.

Brennan IT **2014 – 2016**
Security Advisor

Background:

Brennan IT delivered end□to□end managed security, covering device monitoring, assessments, and design advice; as an SME, they served a compact corporate base across NSW and VIC.

Position Overview:

Managed security offerings at Brennan IT, spanning device monitoring, assessments, and advisory; maintained and upgraded back□end platforms and complex firewalls; provided client consulting and kept servers optimised.

EMPLOYMENT HISTORY (CONTINUED)

Key Achievements:

- Guided transition of security stack to a hybrid cloud setup, increasing flexibility and resource use.
- Built and adopted a standard vuln assessment method, yielding more precise threat discovery.
- Partnered with agencies to align to new cyber rules, avoiding possible liability.
- Restored service from a major outage in 2 hours, curbing disruption and losses.
- Performed deep security reviews for marquee clients, finding and fixing critical flaws.
- Modernised firewalls for IPv6, future□proofing the network and enabling smooth adoption of new tech.

Transurban **2011– 2013**
Systems Security Analyst

Background:

Transurban works in transport infrastructure, running toll road networks and their tolling systems; a multinational with long□term contracts across Australia, the US, and Canada.

Position Overview:

Core contributor on the Transurban security team, coordinating audits, assessments, and security projects; helped deploy upgraded controls, mentored staff, and led awareness training; selected external firewall services to enable round□the□clock monitoring.

Major Business Achievements

- Delivered an effective awareness program, cutting staff□related incidents by 45%.
- Helped deliver SSO, simplifying access management and strengthening security.
- Ran a detailed policy gap analysis, finding and fixing weaknesses in the security program.
- Worked across functions to design and roll out a strong security system design, uplifting posture.

- Assessed and chose a managed firewall vendor, delivering improved threat detection and real-time monitoring.
- Produced UAM and SSO specs, materially improving policy compliance and access control.
- Reduced risk through detailed threat assessments and reviews of security tools and services.

TERTIARY EDUCATION

- **Edith Cowan University**
  Bachelor of Science (Computer & Security) (HON)

FURTHER PROFESSIONAL DEVELOPMENT

- GIAC Certified Incident Handler (GCIH)
  Achieved exam scores of 97% and 99%
- COBIT 5 Foundation

TECHNICAL PROFICIENCY

- Firewalls: Palo Alto, pfSense, Fortinet, Juniper, SonicWall, Check Point, iptables, nftables, ipfw, pf, etc.
- Threat detection: UEBA, IDS, Suricata, Zeek, Tripwire
- Routing: IPv6, 802.1X, Wi-Fi LAN, BGP, OSPF, IKEv2, TLS, GRE, IPsec, PSK, EAP, etc.
- OS: Windows Server, Linux, AIX, macOS
- Telemetry: NMS, Icinga, Cacti
- IAM: Duo MFA, YubiKey, SAML, SSO
- Languages: Python, PowerShell, PHP, Perl, KQL, SQL, C, Bash
- Devices: HP, HPE blades, Cisco NX-OS, F5 BIG-IP
